

How to Prevent Additional Trash During Cleanups

- Collect trash in buckets and combine into one trash bag at the end of cleanup.
- Use a grabber and/or reusable gloves to pick up trash instead of a plastic glove.
- If you are using plastic gloves, use only one.
- Have a designated person pick up the trash and another to record it.
- Wear a reusable facemask instead of single use disposable.
- Fill up your reusable beverage container at home and bring it with you.
- Bring any snacks in a reusable pouch or container.
