

BACK TO SCHOOL WITH CARE

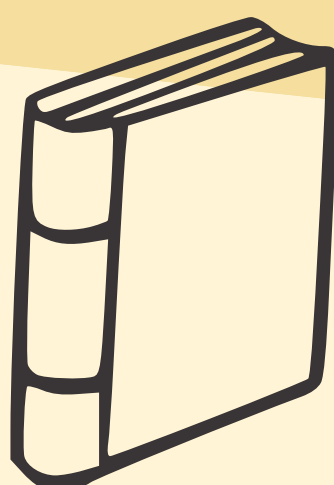

1. Thrift your back-to-school outfits

By doing this you are helping to keep clothes out of landfills and reducing your carbon footprint

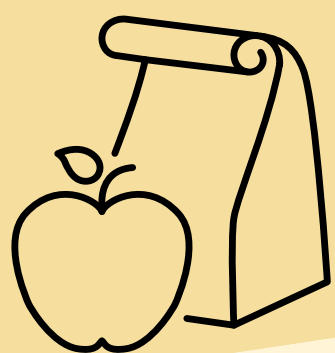

2. Rent or buy used textbooks

Not only will you save money, but save trees as well

3. Be mindful at lunchtime

Bring reusable utensils and use beeswax wrap or reusable containers when packing your lunch

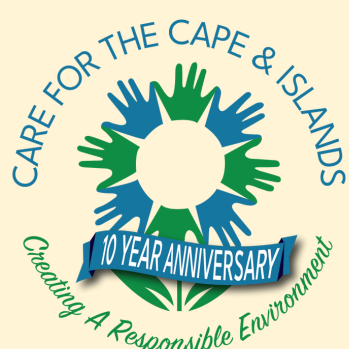

4. Share school supplies

If you have extra notebooks, folders or more share them so they don't go to waste

5. Shop Locally

Not only are you supporting local businesses, but you are skipping the packaging from when you order online
